

# Oklahoma Spotlight on Excellence in Perinatal Care

The Oklahoma Perinatal Quality Improvement Collaborative (OPQIC) seeks to reward hospitals that are creating a culture of excellence in perinatal care for Oklahoma mothers and newborns. Oklahoma birthing hospitals meeting certain criteria will be recognized as "Spotlight Hospitals" at the 4<sup>th</sup> annual OPQIC summit on September 29, 2017. The criteria will be based on participation in and outcomes of quality improvement initiatives that are available to all birthing hospitals. They will change on a yearly basis as focus areas for improvements evolve. As activities progress, criteria will become more stringent and will be based on process, structure and outcomes measures, if available. Spotlight Hospitals will be rewarded and recognized at the Summit and on the OPQIC website. Contact [info@opqic.org](mailto:info@opqic.org) with questions.

## 2017 Spotlight Hospital Criteria

Criteria will be evaluated as of **August 31, 2017**.

- Hospital Compare
  - 1) PC-01 (Early Elective Delivery) rate on [Hospital Compare](#) at or below the national average
