Pregnancy-related Anxiety during COVID-19: A Nationwide Survey of 2,740 Pregnant Women

Tuesday, July 14, 2020
4:00 – 5:00 p.m. EDT

Register here: <https://bit.ly/3i48TFT>

In March 2020, “stay-at-home” orders began being put in place in various US States due to the growing COVID-19 pandemic. A team of researchers at the University of Michigan were interested in learning how pregnant women thought and felt about the changes in prenatal care, reduced contact with providers, and uncertainty regarding delivery protocols. They launched a brief, anonymous, online survey of pregnant women. The survey was open for a 3-week period and distributed via Facebook, Twitter, other social media platforms, and pregnancy-specific professional communities. In this webinar, Dr. Muzik will present the survey findings. After her presentation, there will be an interactive discussion moderated the Lifeline4Moms team.

Study Team

Maria Muzik, MD, MS (Presenter)

Associate Professor, University of Michigan Department of Psychiatry
and Department of Obstetrics and Gynecology
Co-Director, Zero To Thrive and
Women and Infants Mental Health Program (WIMHP)
Medical Director, Perinatal Psychiatry Service
Medical Director, MC3 Perinatal

Cheryl A. Moyer, PhD, MPH

Associate Professor of Learning Health Sciences
Associate Professor of Obstetrics and Gynecology

Sarah D. Rominski, PhD, MPH

Research Assistant Professor of Obstetrics and Gynecology
Countries of Interest: Ethiopia, Ghana

Elizabeth Kaselitz, MSW

Clinical Research Project Manager
Manager, Global Health Research Certificate Program
