LDA Clinic Workflow

1. Patient completes screening form during first prenatal appointment.
2. Nurse completes screening form with patient and/or asks score.
4. Patient is provided aspirin education brochure.
5. Provider e-prescribes low-dose aspirin to patient's preferred pharmacy.
6. Patient attends following prenatal appointments.
7. Nurse completes medication rec, identifies barriers to adoption.
8. Provider asks about patient concerns regarding aspirin.
9. L&D asks about prenatal vitamins and aspirin use in pregnancy.

Incorporate doulas - ability to answer questions, reinforce medication compliance.
