Oklahoma Health Alert Network

What is the Oklahoma Health Alert Network (OK-HAN)?

- A communications system to rapidly provide emergent health information to healthcare providers and public health partners within Oklahoma.
- The OK-HAN system operates as part of a nationwide network of Health Alert Networks (HANs), and follows guidelines and policies set by the Centers for Disease Control and Prevention (CDC).
- The OK-HAN system consists of a secure website where registered users log on and access distributed notifications and information stored in document libraries.
